

# Improving Urban Mobile Connectivity

At FarrPoint, we help local authorities unlock the potential of their urban environments to support improved mobile connectivity.

**Enhancing Mobile Connectivity at Dumfries and Galloway Royal Infirmary**

**Enhancing Mobile Coverage in the Historic City Centre of Chester**

## Our work

**Strategic Connectivity Analysis for West Midlands 5G Metro**

**Supporting Scottish Futures Trust to deliver the Infralink Programme**

## We can help you with:

- ✓ **Options Identification:** Use data-led insights and market intelligence to identify areas where mobile connectivity improvements are most likely to succeed and will have the greatest impact.
- ✓ **Market Engagement:** Facilitate meaningful discussions with Mobile Network Operators (MNOs and Neutral Hosts) to identify suitable solutions to improve connectivity.
- ✓ **Commercial and Legal Support:** Provide support with any commercial negotiations (open access agreements, working with PFI partners, pricing of assets).
- ✓ **Expert Advice and Capacity Building:** Support internal teams such as Street Lighting, Highways / Roads, Property, Planning, Heritage and Legal – to build the knowledge and capacity needed for ongoing success.

**GET IN TOUCH - [INFO@FARRPOINT.COM](mailto:info@farrpoint.com)**

We understand the intersection of digital infrastructure, local government priorities, and commercial viability and provide independent, pragmatic advice that helps our clients progress their mobile connectivity ambitions with confidence.
